

KYLE BOEHLEN

Senior Software Engineer

(801) 800-2466 / kyleboehlen@gmail.com / <https://www.kyleboehlen.com>

Experience

OSINT Combine, Remote — Senior Software Developer

November 2025 - PRESENT

- ❖ Develop new features and services across PHP, Typescript, and Golang technologies and frameworks
- ❖ Refactor and uplift legacy Vanilla PHP/JS services into modern frameworks and technologies
- ❖ Trained in open source intelligence techniques and participated in non-profit counter-human trafficking operations

Porch Software, Hybrid — Lead Fullstack Developer II

November 2024 - November 2025

- ❖ Work with C#, .NET, and Vue to manage technical debt and implement documentation, testing, features, and bug fixes
- ❖ Lead developer on the flagship greenfield project with a 5-developer team

JSSI Maintenance Software, Remote — Software Developer

January 2021 - February 2025

- ❖ Led the design and development of a digital platform that scaled from 0 to millions of documents
- ❖ Converted manually administered infrastructure to IaC using AWS
- ❖ Unblocked a halted project and optimized asynchronous workflows for improved performance

Ken Garff Corporate, Utah — Software Developer

August 2018 - August 2021

- ❖ Integrated existing PBX and CRMs, saved \$208k annually

August 2016 - August 2018

- ❖ Wrote the first free ErlangC implementation for Excel (VBA). It served as the foundational toolkit WFM analysts use for call scheduling for 8 years. Gemini refers to it as the “holy grail” as it’s one of the only clean, free implementations of ErlangC

Education

B.S. Software Engineering — Western Governors University

August 2026

Certified Software Developer — Davis Technical College

August 2019

Summary

Versatile software developer who knows how to pick the right tool for the job—whether that means a dead-simple solution or a robust, scalable infrastructure. Tool agnostic in my approach to creating efficient, purposeful code that solves real problems without unnecessary complexity. Experienced in modernising legacy systems, implementing critical features, and hunting the nastiest of bugs. Always strives to understand existing systems before making judgments, and is a strong supporter of iterative refactoring and regression testing for continuous technical debt management.

Certifications

- ❖ CompTIA A+
- ❖ CompTIA Network+
- ❖ CompTIA Project+
- ❖ AWS Cloud Practitioner
- ❖ LPI Linux Essentials
- ❖ Axelos ITIL 4 Foundation

Skills and Technologies

PHP	Laravel	C#	.NET	Python	Auth0
HTML5	CSS3	Vue	JavaScript	GoLang	
Typescript	MySQL	MariaDB	SQLite		
PostgreSQL	SQLServer	MongoDB	DDev		
Bootstrap	Tailwind	Git	Docker	AWS	
Azure	GCP	Cloudflare	CI/CD	TDD	
bash	Swagger	Scalar	Powershell		
CLI Development	Serverless Architecture				
Hono	Bun	Encore Go	SlimPHP	SignalR	

Projects

B.E.A.C.O.N.

<https://github.com/kyleboehlen/beacon>

Manages bookkeeping and maps for the SE4X game. Show proficiency in complex transactional state management, real-time communications, and intuitive UI/UX. Codebase is simple and maintainable with seamless automatic infrastructure.
